CEN-CENELEC

Background

- Rationale:
  - Change of technology
  - Split between ‘general public’ information and CEN and CENELEC ‘expert’ content
  - Increase the streamlining of information
  - Offer tailored and up-to-date content for our stakeholders
  - Modernise the look and feel
  - Improve user experience and offer a more responsive website

Common CA decisions of March 2019 to merge the 3 websites (CEN/CA 22/2019 and CENELEC/CA 152/33)

CENELEC SECTORS

Mechanical and Machines

The mechanical and machinery sector include technical bodies that deal with different types of industrial and domestic machinery. Some of the industries covered are manufacturing, mining, welding, construction and agriculture. Lifts, tanks and pressure equipment are also covered.

Standards keep the pace of technological development. New technologies such as Artificial Intelligence (AI), are progressively being implemented in fields like automation, data management and as part of smart technology (e.g. additive manufacturing, robotics).
Not only has the sector an important role when it comes to an operator's safety but also contributes to environment protection by developing standards that allow the production of environmentally friendly machines.

Many standards are identical to international standards: this is an important characteristic, since the markets for these products tend to be global, going beyond national or European markets. The mechanical and machinery sector is therefore a good example of bringing together European requirements with an internationally accepted approach.

A considerable proportion of the documents produced in the sector are harmonized standards giving presumption of conformity with the EU Directives on machinery (2006/42/EC), measuring instruments (2014/32/EU) and Non-automatic weighing instruments (2014/31/EU).

The Sector Fora i.e. CEN-CENELEC Sector Forum on Machinery and Pressure Equipment Advisory Nucleus advise Technical Boards and coordinate standardization activities related to the respective field.

CEN-CENELEC-ETSI Coordination Group on Smart Manufacturing

The CEN-CENELEC-ETSI Coordination Group on Smart Manufacturing (SMa-CG) was created to coordinate the European standardization activities relating to new technologies in the field of manufacturing. It is a joint group of CEN, CENELEC and ETSI which advises the CEN-CENELEC Technical Boards and the ETSI Board.

SMa-CG gathers CEN, CENELEC and ETSI members, their relevant Technical Bodies and groups and the European Commission. The European associations, initiatives, research projects as well as international organizations and initiatives are welcome to participate in specific meetings upon the agreement of the Chairman.

Chair: Dr Jens Gayko, VDE
Secretariat: Ms Katharina Sehnert, DIN

Technical Bodies

CLC/BTTF 128-2 - Erection and operation of electrical test equipment
CLC/TC 116 - Safety and environmental aspects of motor-operated electric tools
CLC/TC 2 - Rotating machinery
CLC/TC 26 - Electric welding
CLC/TC 44X - Safety of machinery: electrotechnical aspects
CLC/TC 66X - Safety of measuring, control, and laboratory equipment

CEN/CLC/JTC 18 - Non automatic weighing instruments (NAWI)
CEN/CLC/WS Monsoon - Predictive management of data intensive industrial processes
CEN/CLC/WS ZDMterm - Zero Defects in Digital Manufacturing Terminology

About CENELEC
The European Electrotechnical Committee for Standardization is one of three European Standardization Organizations (together with CEN and ETSI) that have been officially recognized by the European Union and by the European Free Trade Association (EFTA) as being responsible for developing and defining voluntary standards at European level.
CENELEC Communities | Technical Work | Structure and Governance
CENELEC, the European Committee for Electrotechnical Standardization, is an association that brings together the National Electrotechnical Committees of 34 European countries
CENELEC prepares voluntary standards in the electrotechnical field, which help facilitate trade between countries, create new markets, cut compliance costs and support the development of a Single European Market.
CENELEC supports standardization activities in relation to a wide range of fields and sectors including: Electromagnetic

Q&A

Is a CENELEC website site map available? (CA)

Not available.

Instead, possibility to see site structure through horizontal scroll down menu available when browsing on menu bar.

CENELEC Communities | Technical Work | Structure and Governance |

Members | Affiliates | CSBs | European Partners

CENELEC's National Members are the National Committees of the 27 European Union countries, United Kingdom, the Republic of North Macedonia, Serbia and Turkey plus three countries of the European Free Trade Association (Iceland, Norway and Switzerland). There is one member per country.

CENELEC members are national organizations entrusted with electrotechnical standardization, recognized both at National and European level as being able to represent all standardization interests in their country. Only one organization per country may be member of CENELEC.

It is the responsibility of the CENELEC National Members to implement European Standards as national standards. The National Committees distribute and sell the implemented European Standard and have to withdraw any conflicting national standards.

Details regarding this status are given in **CEN/CENELEC Guide 22 - Guide on the organisational structure and processes for the assessment of the membership criteria of CEN and CENELEC**.

Q&A

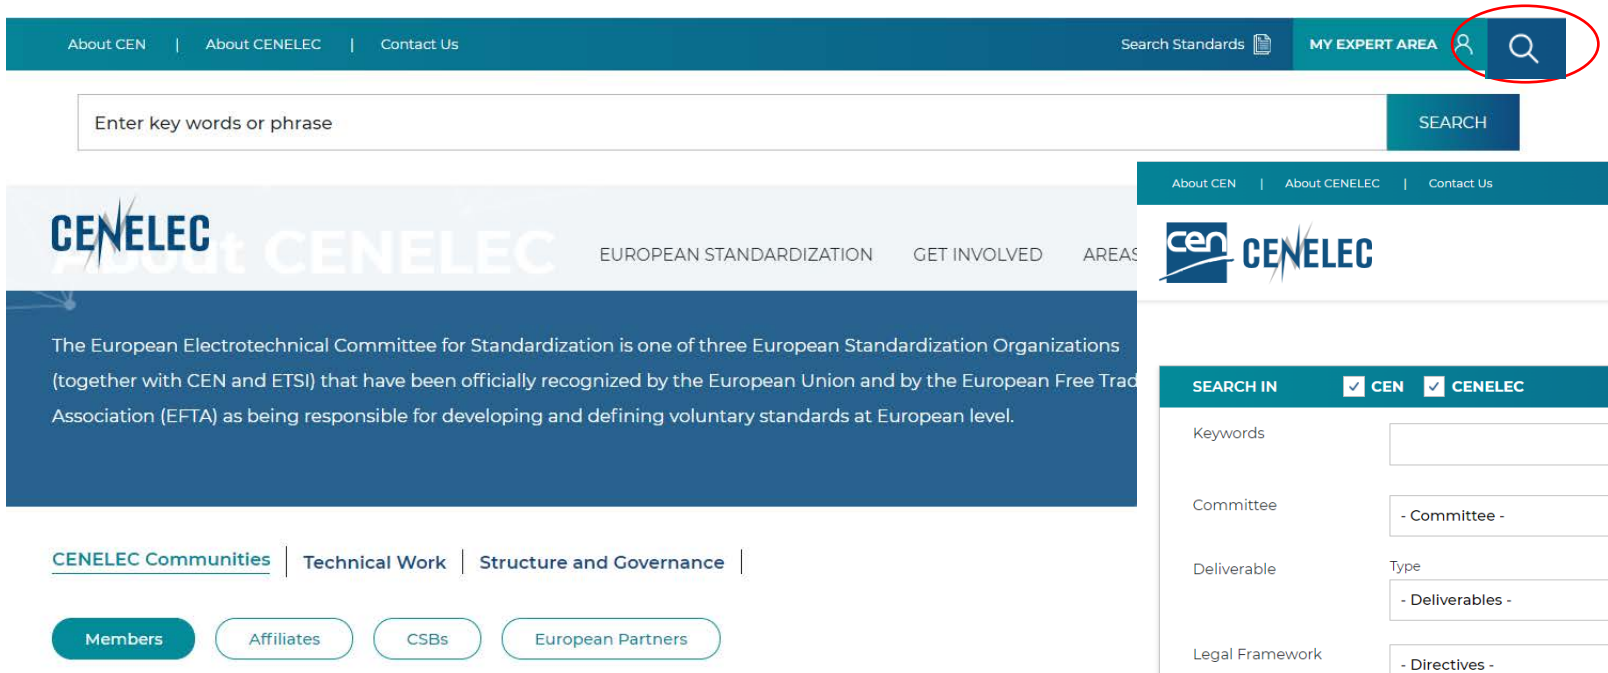
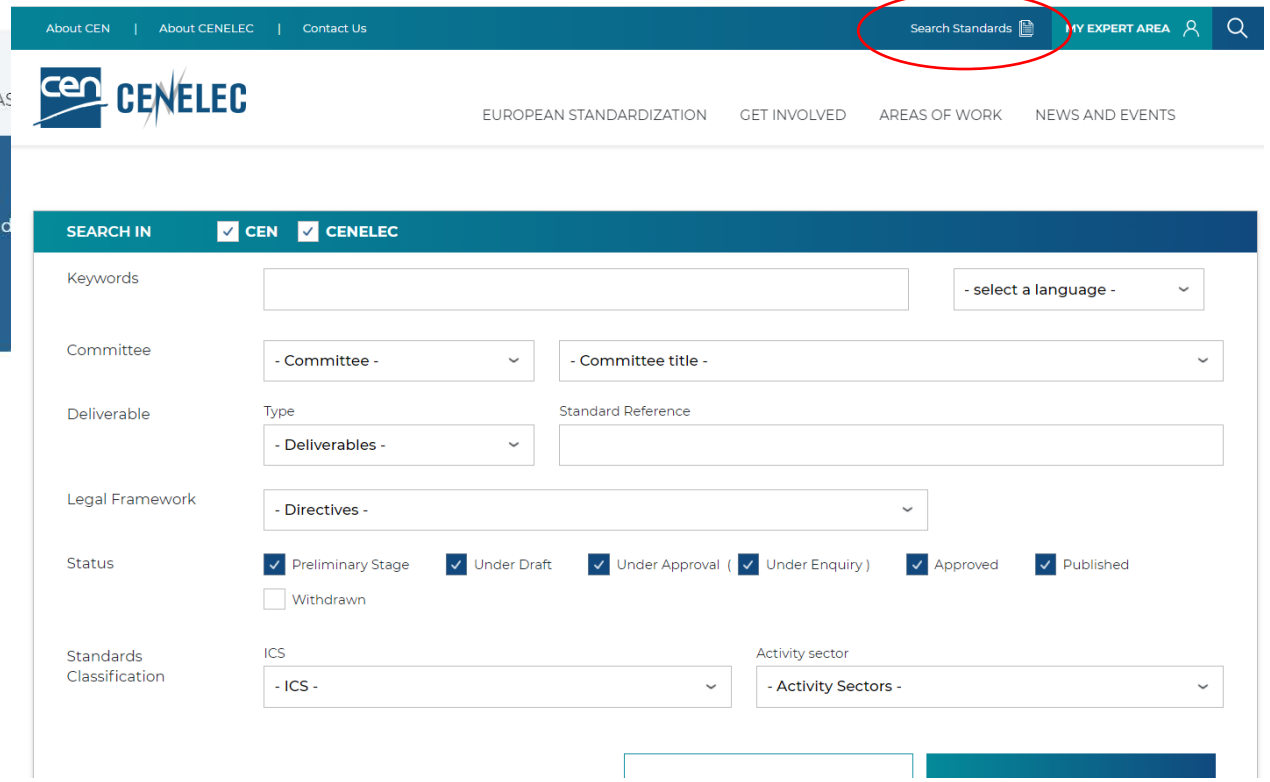
What is the difference between search website and Search Standards





© CENELEC 2021

Q&A

Where do I find the email of a TC Chairperson? (EC)

Where do I find the names and emails of TC assistant secretaries? (EC)

Information currently partially available on Projex-Online. Provision of the related information is currently under discussion internally considering also GDPR aspects.

Q&A

Where can I find the consolidated table of TCs with their Secretary, Assistant Secretary, Chair, dependencies and terms of office? (EM)

Information not available on Public Website

Information available on Projex Online. End of term will be added **TO DO ➔ Early December**

Provision of consolidated list (as previously provided on CENELEC web site) **TO DO ➔ Early January**

Q&A

How can I search for CENELEC standards only? (EM)

Search Standards + uncheck CEN

Q&A

Is it possible to display the withdrawn standards? (EM)

We have added this option in Search Standards

DONE

Q&A

How can I find the relations between the European Directives and the CENELEC standards? (EM)

Search by directive Available on Projex Online and public web site.

Q&A

In Search Standards, when using the Keywords field, the operator seems to be OR instead of AND. Can you change that? (EC)

The OR operator is selected by default.

The exact phase can be searched by using double quotes (eg "x x“.

The operator can be changed to AND by default if needed.

Q&A

Why are the TC/SC/SR not sorted in numerical order? (EM)

Will be fixed **TO DO ➔ Early December**

Q&A

Why isn't it possible to find a technical body (or a NC) using the search engine on the website? (EC)

Feasibility to be investigated.

Q&A

In Search Standards, when exporting the results of a search, why don't we get all the displayed data in the Excel report? (EM)

The public website is meant for quick searches. All detailed results are available in Projex-Online for Members & Experts.

However, we decided to further complete the XLS extract from the public web site with the following data:

Title (en), WI number, DOR, DAV, DOA, DOP, DOW

DONE

Q&A

Various requests to add specific search criteria to Search Standards (EM)

Out of scope for wide public. Detailed search criteria available in Projex-Online.

Q&A

Can we export the doa/dop/dow/dor/dav for standards ratified within a given period? (EM)

Projex-Online is the preferred tool when requiring more specific search critaria (eg: selection for a stage within a given period).

However, doa/dop/dow/dor/dav are currently missing from the resulting XLS file.

Missing information will be added in Projex Online **TO DO → End January**

Q&A

Is it possible to have a shortcut to my TC dashboard page? (EM)

Favorites in Projex-Online or "Access to TC platform" on TC page in Projex-Online

Q&A

How do we access the ftp server? (EM)

Access via the FTP link in Expert Area and a FTP Client like FileZilla.

Q&A

Is there a dedicated place with the checklist, guiding materials, templates, etc. for drafting harmonized standards? (EM)

Available on the BOSS:

https://boss.cenelec.eu/homegrowndeliverables/en/pages/enforojeu/

Q&A

Where can I find the CENELEC BOSS? (EM)

Link to BOSS available in the Expert Area

Q&A

In the section “Standard evolution and forecast”, can you add a list with the standards withdrawn over the last two months? (EM)

Will be added **TO DO ➔ End January**

Q&A

Why can't we sort the search results? (EM)

To be investigated (not available in former web site).

Q&A

In the standard page, can you add the IEC Technical Body? (EM)

Will be added **TO DO ➔ End November**

Q&A

How can I extract the list of HDs depending from my NC for review purpose? This is mostly used in the case of SRs and this can also be considered for other deliverables in an SR portfolio? (EM)

TC secretaries receive an alert report on a monthly basis, which includes the standards that need to be reviewed (i.e. alert 5).

On Projex-Online, a list of standards under “Review” alert can be extracted (demo).
