IT Webinar “Livelink – status update”

2022-10-11

Termination of Livelink services

© CEN-CENELEC 2022

Termination of Livelink services

Termination of CEN (and CENELEC) Livelink services from **1st January 2023**

© CEN-CENELEC 2022

Main platforms/services hosted on Livelink

© CEN-CENELEC 2022

Main platforms/services

Technical committees (eCommittees)

Governing bodies

eTrans

- Submission of TC drafts
- Translations (EN/FR/DE)
- Draft/published standards distribution channel

Ad-hoc platforms

- Standardization Requests
- Citation in OJEU
- Cost Control Platform
- Consultant assessment platform
- Projex Data

© CEN-CENELEC 2022

Technical & Governance committees

© CEN-CENELEC 2022

SD Documents – Status + Figures

- Technical committees
  - Migrated since May 2021
  - 2063 committees (active and dormant)
  - 845.000 documents
- Governance committees
  - Migrated since April 2022
  - 61 committees: 37 Governance committees and 24 Sector committees (Sector Fora's, Focus Groups, Coordination Groups),
  - 55.000 documents
- Remaining committees:
  - Currently finalizing the migration of the disbanded committees and some other remaining groups still hosted at DIN and AFNOR

© CEN-CENELEC 2022

SD Documents – Main benefits

- Common environment for all CEN, ISO and national committees
- Clear and transparent permission model (GD role-based access control)
- Controlled numbering system for most committees (N-number)
- Greatly enhanced Document search tool
- For the governing bodies, possible future integration in the CEN ecosystem (e.g: Meeting registration)
- SD Documents is evolutive. ISO is constantly working on new features

© CEN-CENELEC 2022

Other platforms

Remaining platforms on Livelink

- Standardization Requests
  - Request from the European Commission to the ESOs to develop one or several standards to support the EU legislation or public policies.
  - Groups are created to discuss these requests
  - Target: committees in a new tenant in SD Documents

- Citation in OJEU
  - Publication in which all tenders from the public sector which are valued above a certain financial threshold according to EU legislation, must be published.
  - Target: a library of support documentation in SD Documents

© CEN-CENELEC 2022

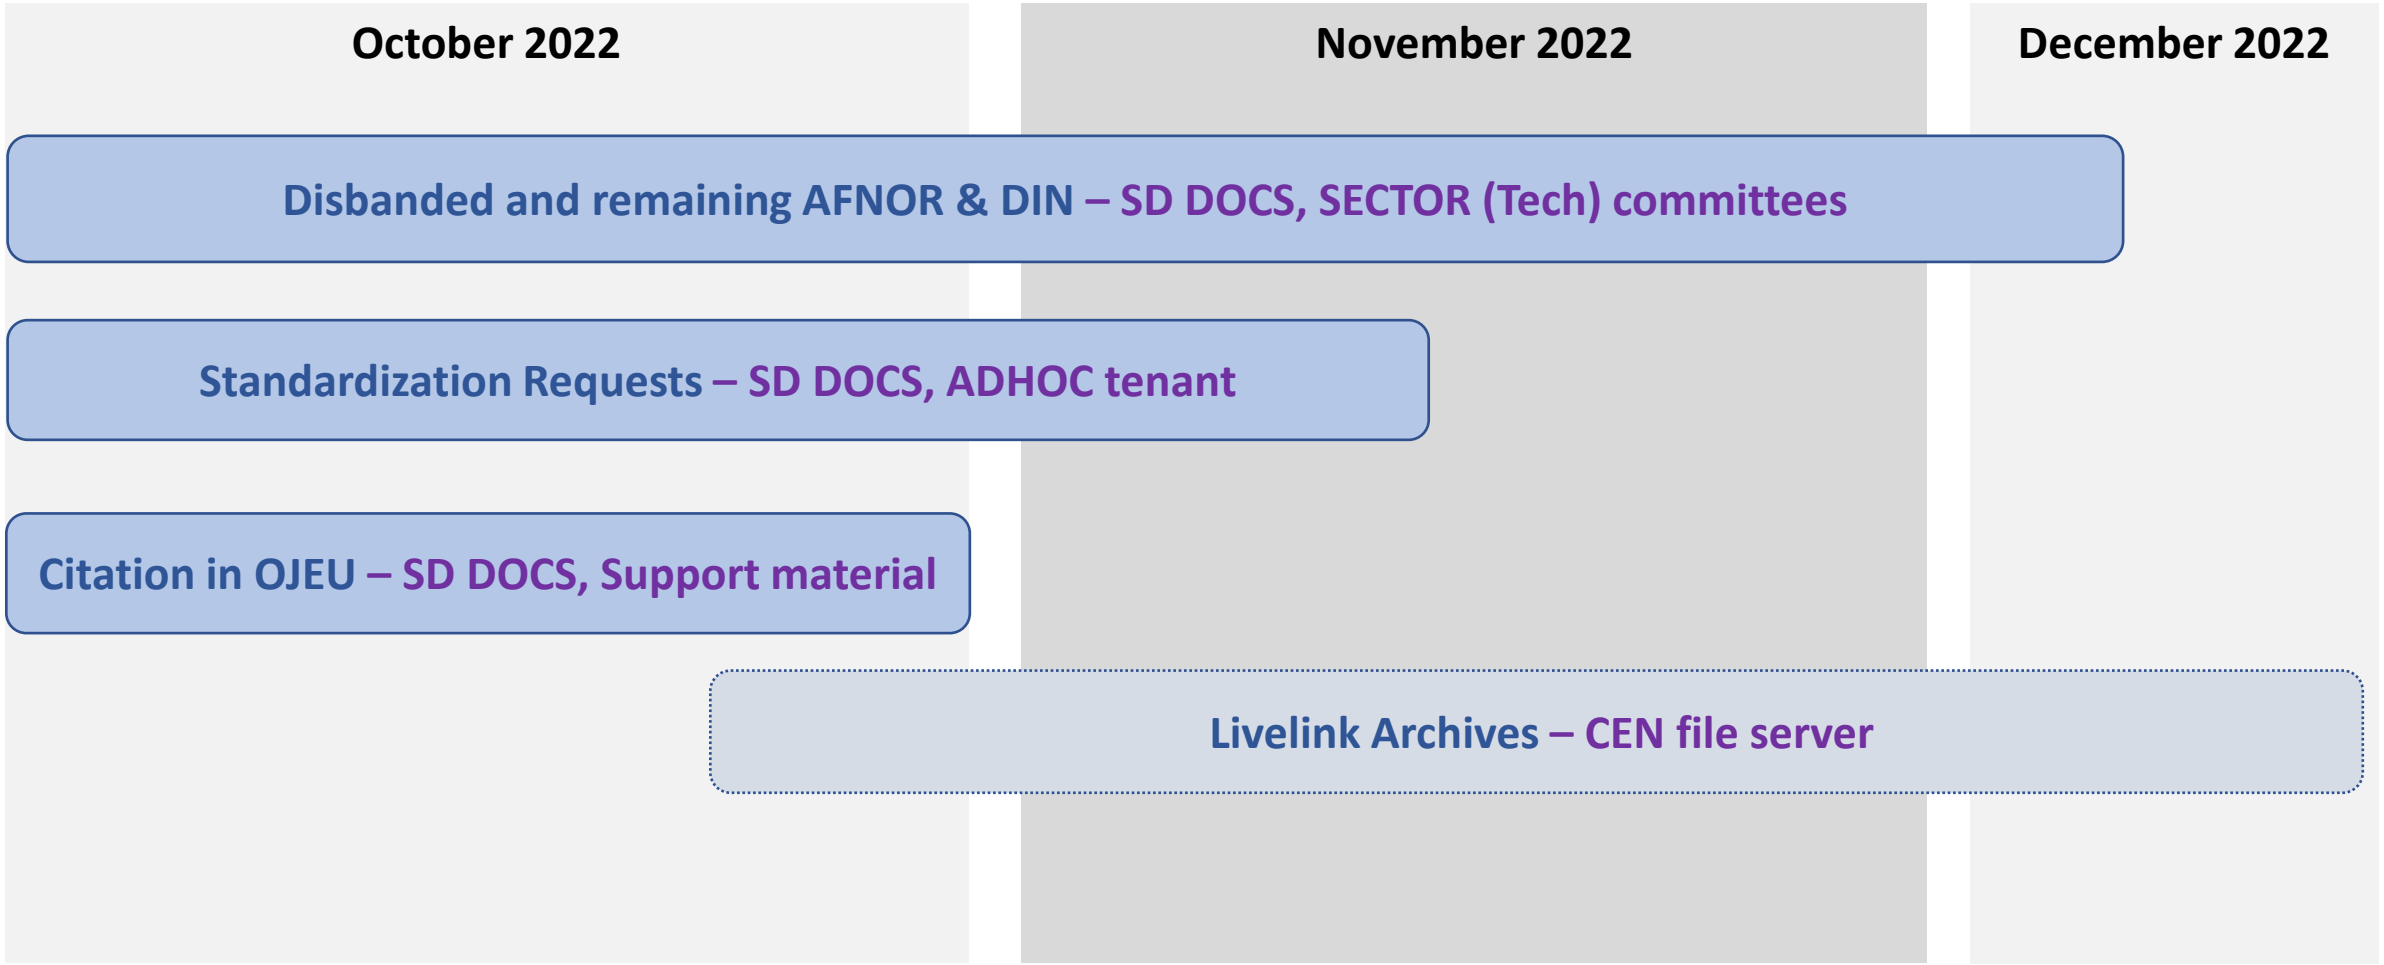
Remaining platforms on Livelink

- Cost Control Platform
  - Communication platform for specific agreements or order vouchers
  - All new contracts are on a EC platform. CEN keeps all projects prior to 2022.
  - Target: evaluation of 2 potential hosting platforms

- Livelink Archives
  - The archiving of the different platforms hosted on CEN/TC were based on different criteria determined by the business internally.
  - Each platform will be migrated in a zip File containing 2 files:
    - one zip file with all the files
    - one file with all the metadata
  - Documents will be available on request only

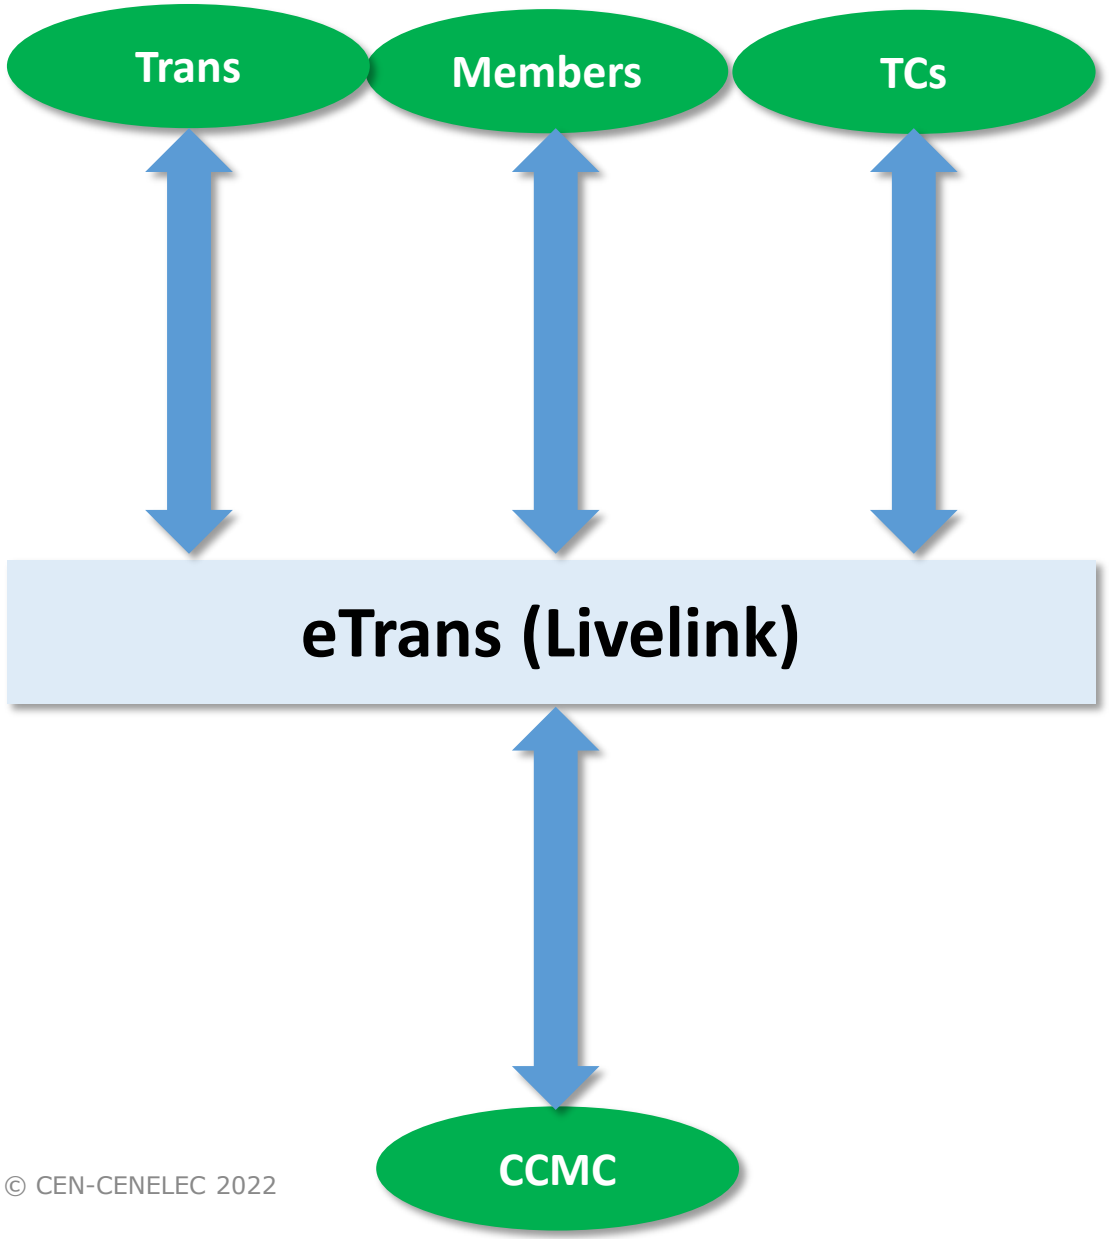
© CEN-CENELEC 2022

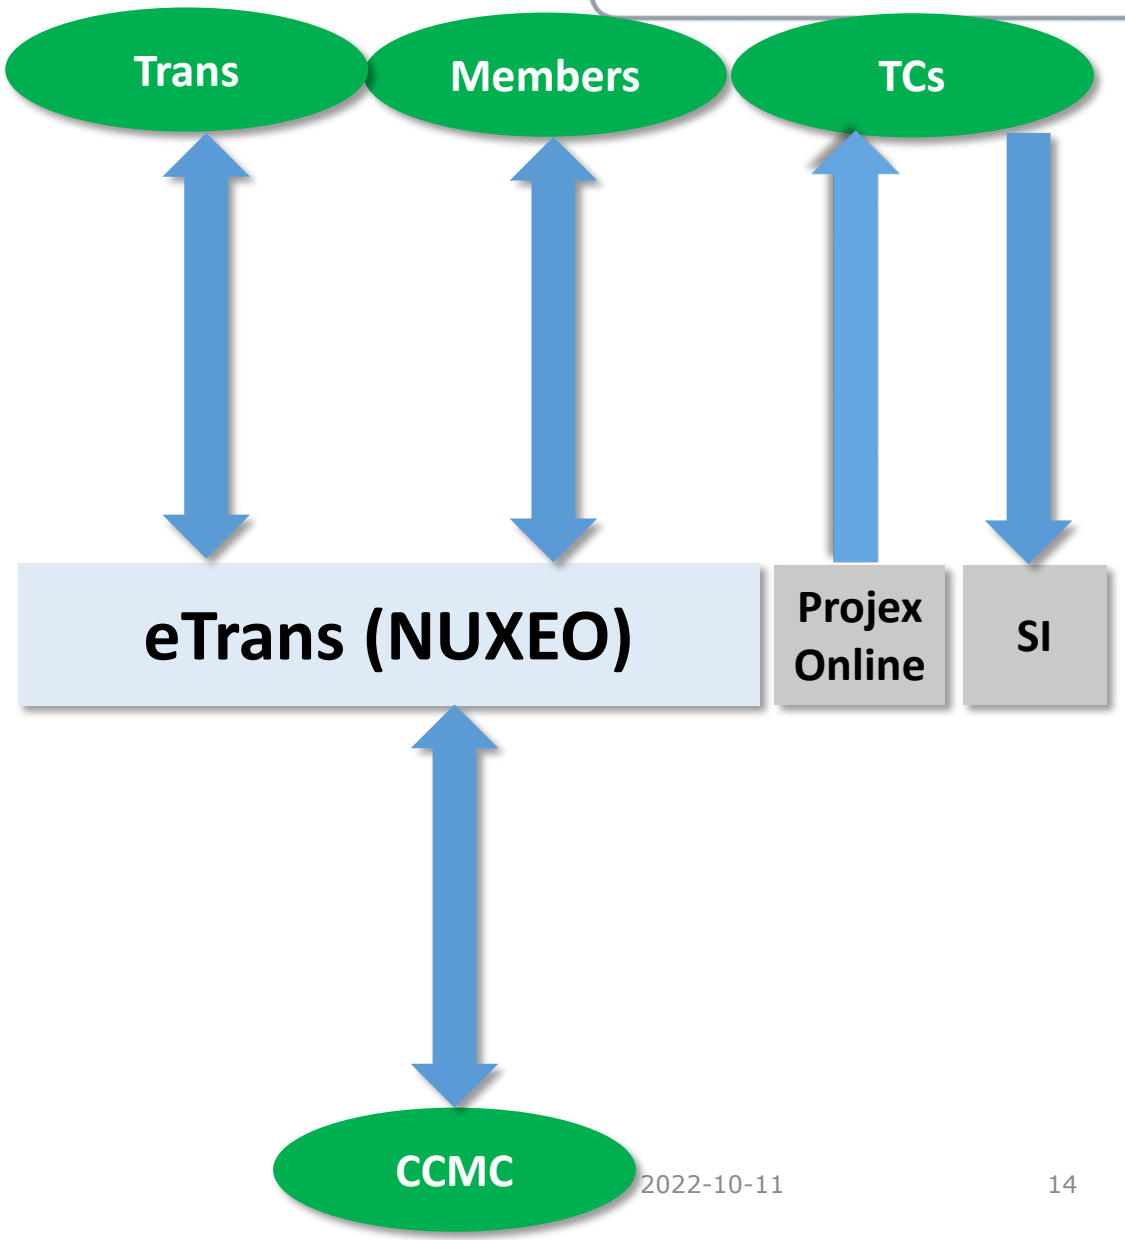
Overall project status



eTrans

© CEN-CENELEC 2022





© CEN-CENELEC 2022

eTrans – Draft/published standards distribution channel

Approach - Platform

- Stay as close as possible to the ISO solution (ISO ICE)
- Distribution channel **with members** (TCs will use other channels)
- No change in the **translation process**

eTrans – Draft/published standards distribution channel

Approach - Platform

- Structure based on **work item ID** instead of TC
  - ✓Stable location for project folder from its initial creation (WIID)
  - ✓Unambiguous relation between a document and the related WI
  - ✓Same navigation as in ISO

- Same **ZIP files and filename conventions** (Note: Moving towards standalone files (word, PDF, XML) will be considered later)

eTrans – Draft/published standards distribution channel

Approach - Migration

- Migration of all the complete collection of **formal documents** (stable delivery enquiry, enquiry draft, vote draft, published) in all available formats (Word/PDF, XML)

- Migration of the **working documents** (first delivery, stable delivery vote, translations) being currently processed in all available formats (Word/PDF, XML)

- No migrations of the former versions (technical versioning) of a given document; Only the latest version is migrated.

eTrans – Draft/published standards distribution channel

Approach – Translation process

- The eTrans NUXEO **test platform** will be opened to the translators (AFNOR, BSI, DIN, DKE) so that they can start assessing the specific translation features (specific search tool, document upload, …)
- A message will be sent to the translators the week of 2022-10-10 to inform them
- Testing period of **2 weeks**
- The feedback will be discussed in a meeting when relevant

eTrans – Draft/published standards distribution channel

Approach - Migration

- The existing publication IDs (former Livelink ID) will be kept in the new platform:
  - ✓No change in the definition of the ID – Number (15)
  - ✓No change in the URN of the Release Items provided in the HAPI
  - ✓No change in the URL of the documents provided in the PROJEXDATA feeds

eTrans – Draft/published standards distribution channel

Approach - Migration

- The launch of **new eTrans on NUXEO** is planned **early December** (final date to be confirmed)
- When launched the **former eTrans on Livelink** is not meant to be used anymore; However, for technical reasons, access cannot be removed or the access to the platform cannot be blocked until 2022-12-31
- The migration of the documents will start in October and is likely to take several weeks. It is therefore possible that the entire standards portfolio is not yet migrated at the time we launch the new platform.

eTrans – Timeline

eTrans Hosting

Livelink terminated (2022-12-31)

Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan

Documents migration

eTrans Beta-version

eTrans Translator testing

eTrans NUXEO Launch (early December)

Submission Interface

© CEN-CENELEC 2022

eTrans – Submission of TC drafts

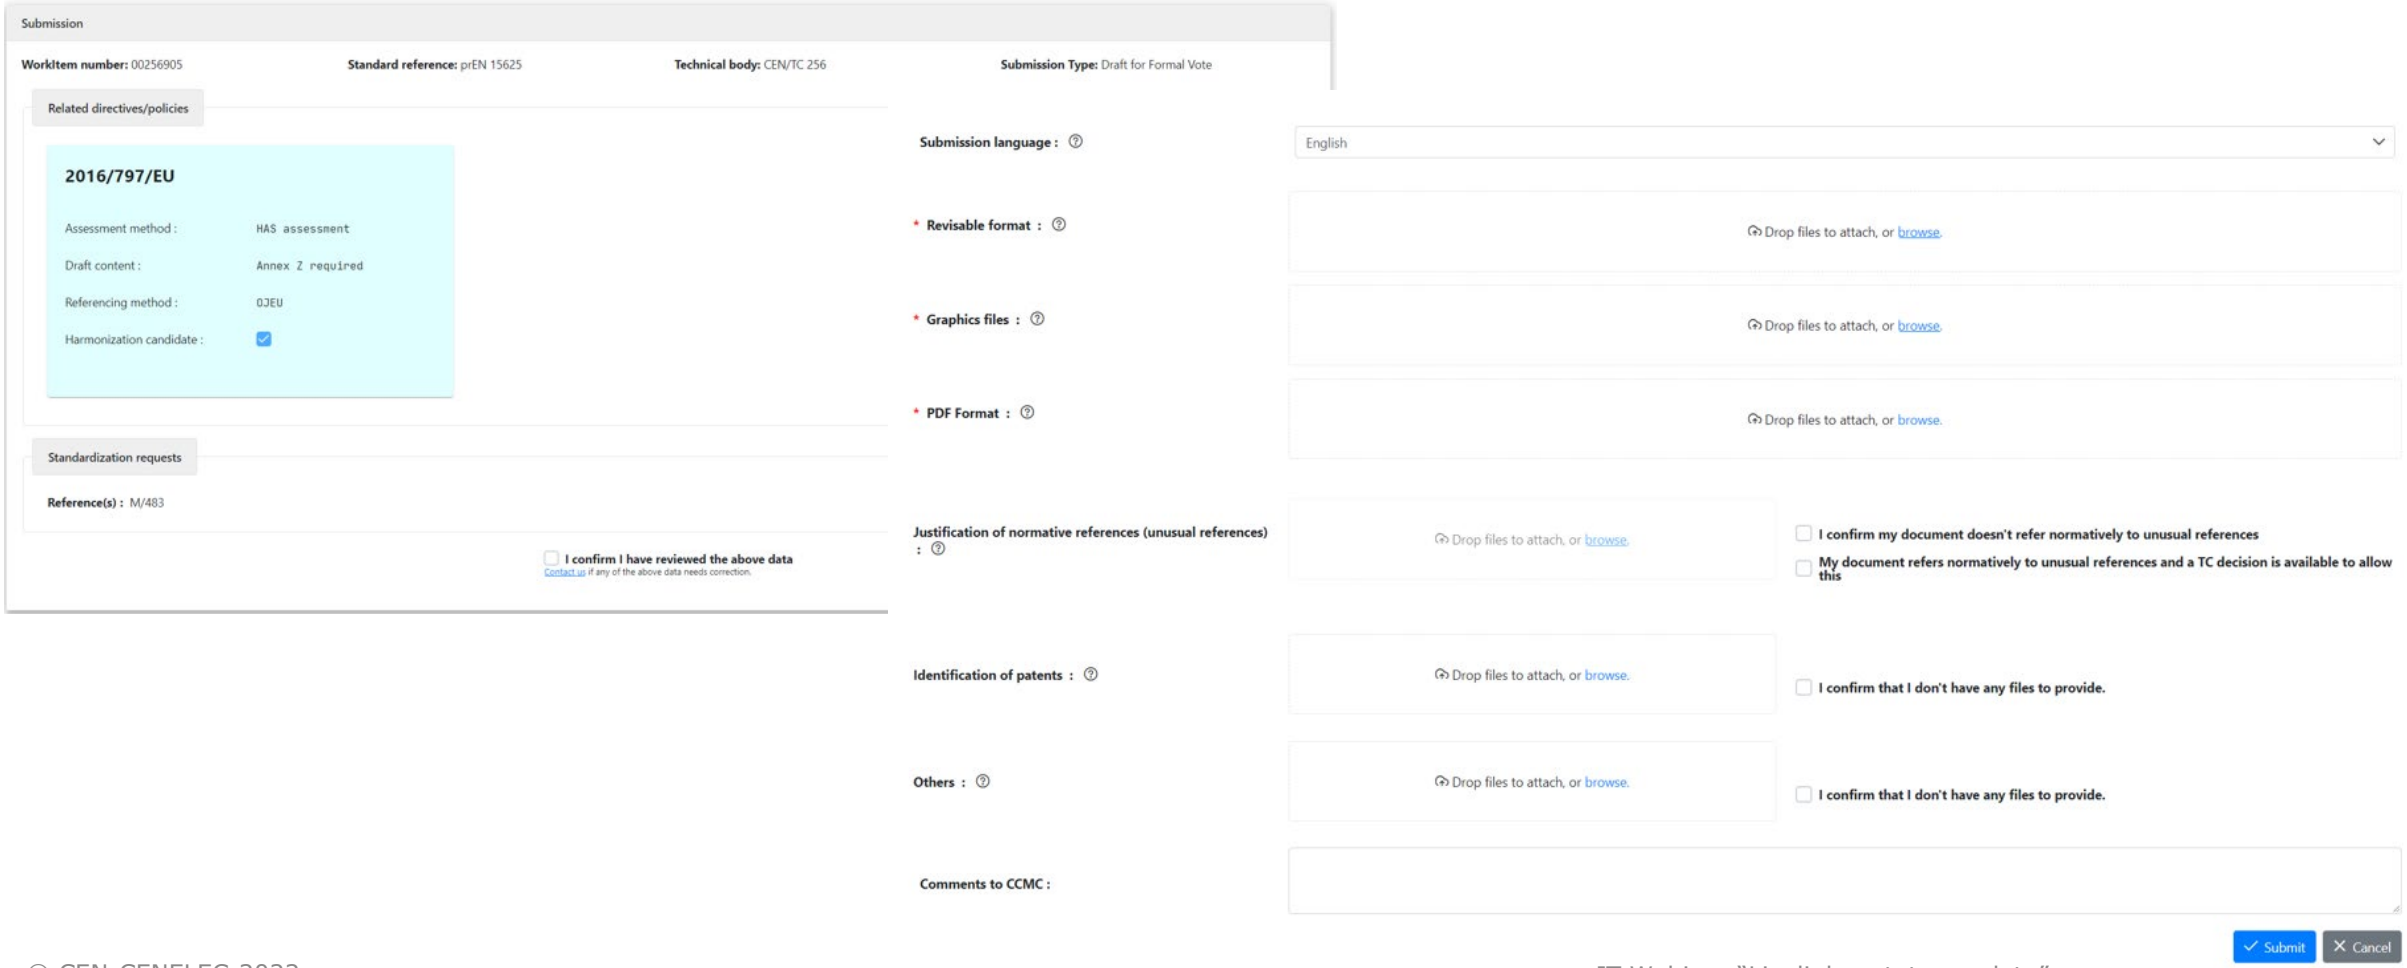
Decisions **CEN BT 009/2020** and CENELEC BT D164/007

Pilot "Submission Interface" launched on 2021-12-03

Full deployment foreseen in 2022 Q4

eTrans – Submission of TC drafts

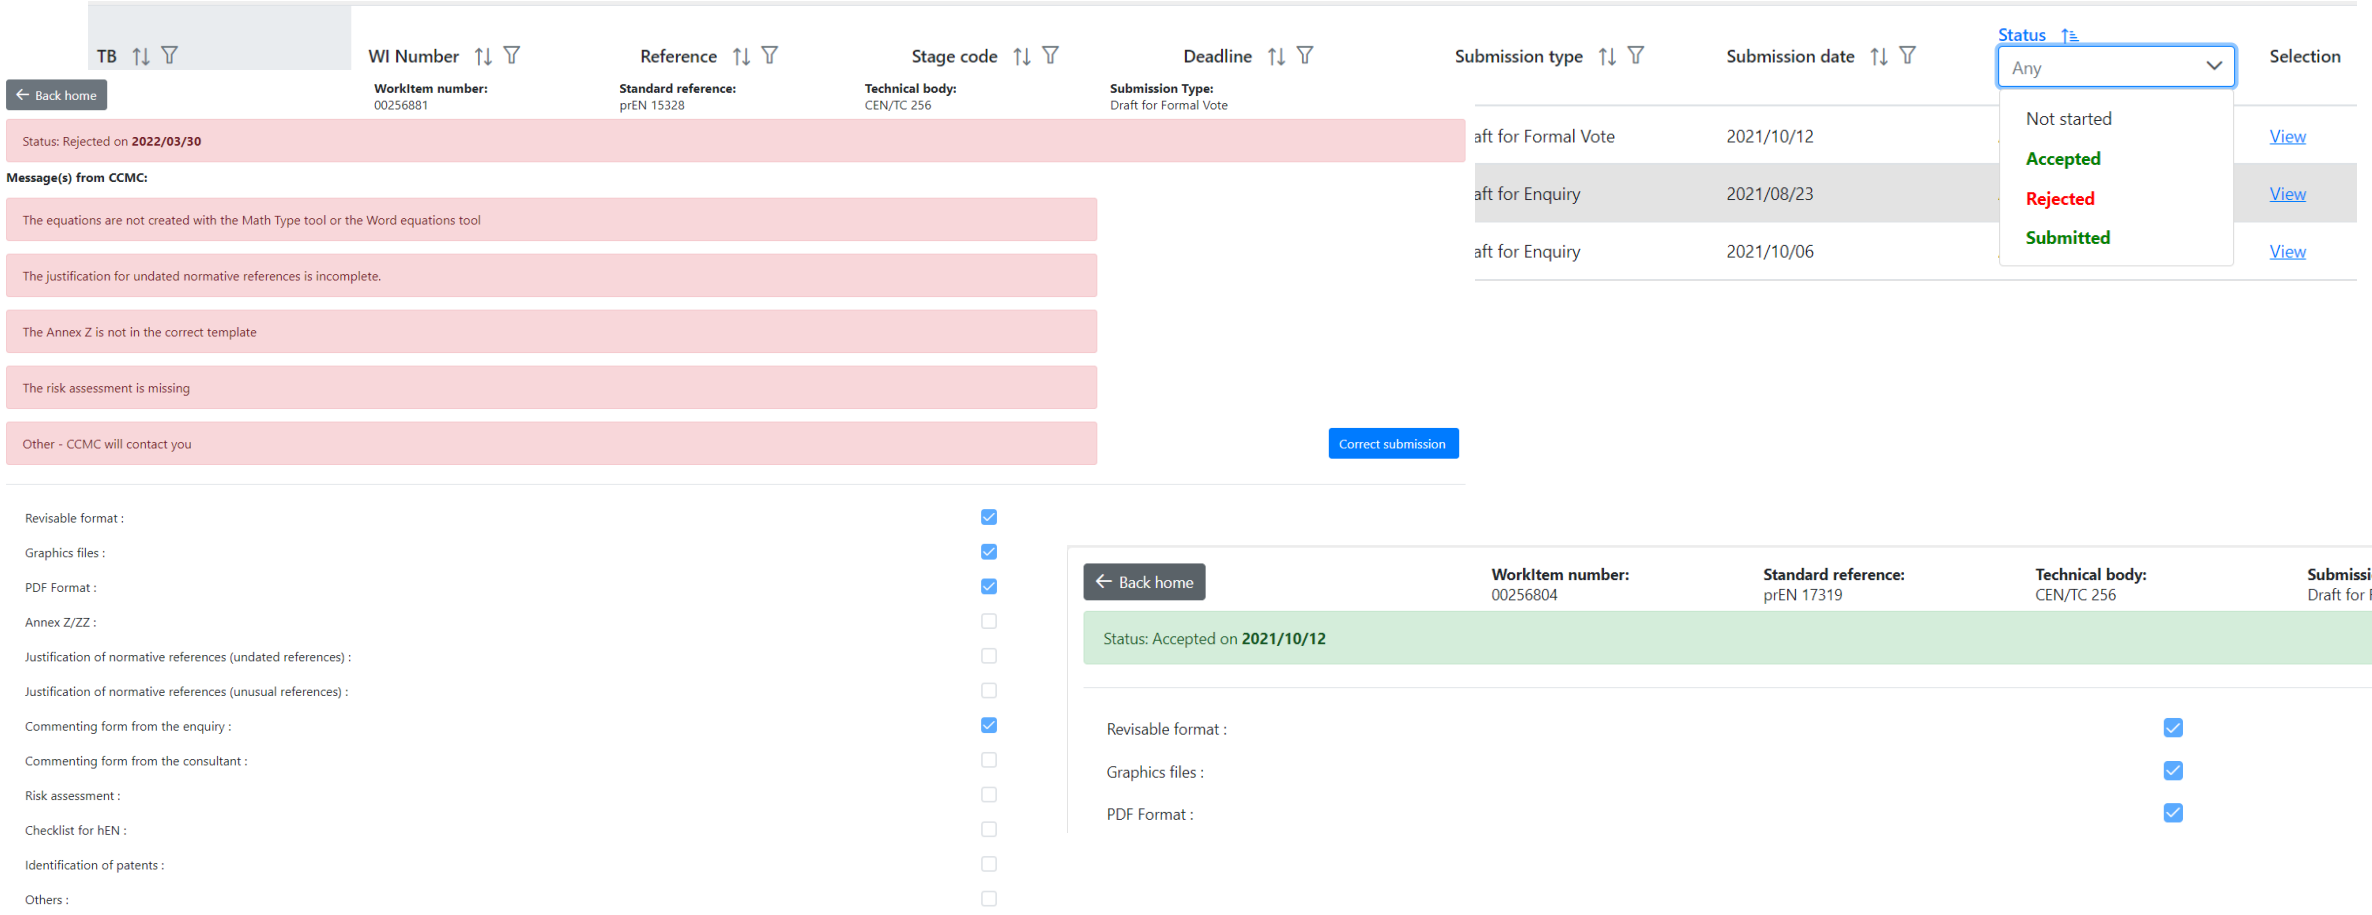
- Streamlined process & easy-to-use interface
  - Control on data, files (mandatory or optional) and quality of the files and technical drawings with confirmation of the user



© CEN-CENELEC 2022

eTrans – Submission of TC drafts

- Visibility on the process and easy access to feedback
  - Direct access to feedback and history with filters and view screens



© CEN-CENELEC 2022

Projexdata & Documents fetching

© CEN-CENELEC 2022

PROJEXDATA

Data feeds available through Livelink:

CEN ProjexData

- full
- Delta
- Event
- InfoPro

CENELEC ProjexData

- full
- Delta
- Event
- InfoPro

➢ Need for an alternative solution to Livelink ➔ feeds accessible through ***REST API*** since 2022-03-31

➢ No change to the ProjexData XML schema

⚠ Requires adaptation of national process to integrate **new access modalities**

© CEN-CENELEC 2022

Document fetching

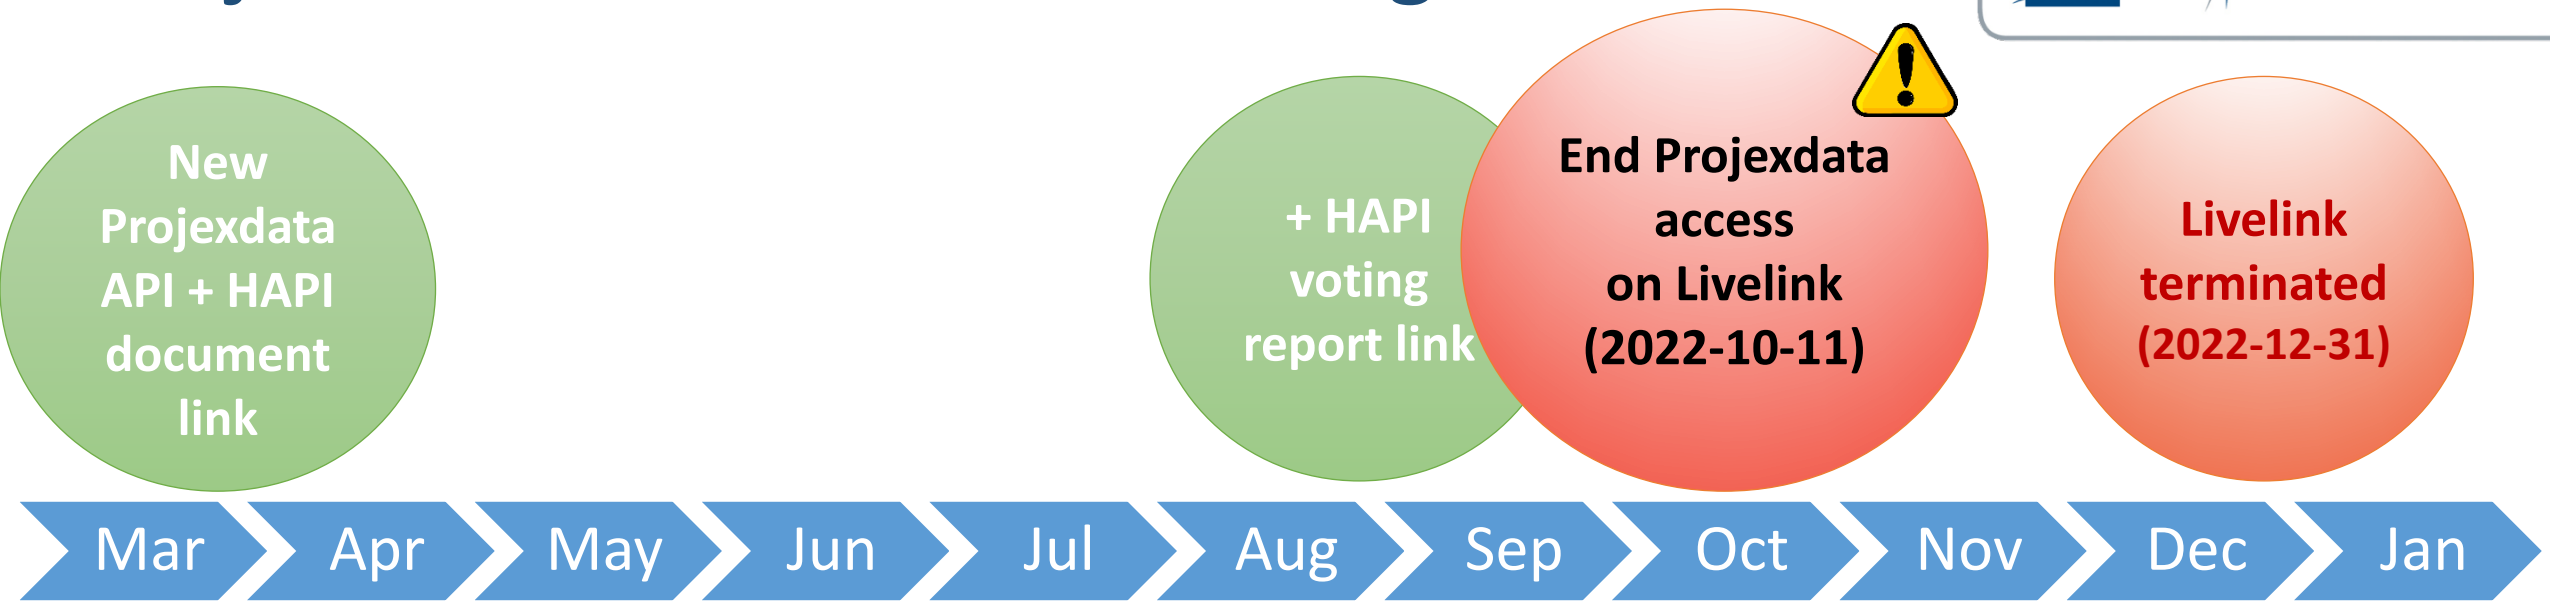
- PROJEXDATA Livelink: use of LiveLink API access modalities for documents

- PROJEXDATA API: access documents through **HAPI**
  - ✓ PROJEXDATA full and delta: new URLs available since 2022-03-31 (except voting reports)
  - ✓ PROJEXDATA full and delta: voting report accessible from HAPI since 2022-10-03
  - PROJEXDATA Events: new URLs available from 2022-10-14

Requires adaptation of national process to integrate **new access modalities**

© CEN-CENELEC 2022

ProjexData & Documents fetching – Timeline



© CEN-CENELEC 2022

Consultant assessment platform

© CEN-CENELEC 2022

New Consultant Assessment interface

- Improve overview and monitoring of the consultant assessment requests
- Facilitate data and document exchanges between CCMC and HAS Contractor/EC Desk Officer
