

Webinar of 2025-01-23

Webinar for CEN-CENELEC/JTCs Officers – ‘New process for the approval of NWIs’

1	Tools of the organization of secretariat for ballot. What might that be?	If a National Standardization Body (NSB) i.e. CEN Member holds the secretariat of the JTC, they use CEN tools (i.e. CIB and Working Area). If a National Committee i.e. CENELEC Member, CENELEC tools (i.e. eVoting).
2	Does the new rule apply also to the Activation of pre-adopted NWIP?	Yes, activation of Preliminary Work Items (PWI) shall follow the 8-weeks consultation, both for CEN- and CENELEC-led JTCs.
3	When will the work area in CEN Projex be activated for JTCs?	On the 4 th of February.
4	I didn't understand the information talking about pending and EU Reg 2480/20228(this was early in the presentation). Grateful for reference to read about it on CEN boss (as I can't specify my question more than this)	<p>CEN: https://boss.cen.eu/reference-material/guidancedoc/pages/votingpolicy/</p> <p>CENELEC: https://boss.cenelec.eu/reference-material/guidancedoc/pages/votingpolicy/</p> <p>There are also links to specific webinars at the end of the PPT.</p>
5	If the NWI is about the adoption of an ISO standard, are there then also 5 countries needed? No writing is done then.	<p>Adoption of published ISO standards: no 5 countries needed; parallel development under Vienna Agreement: 5 countries needed.</p> <p>In CENELEC, 5 countries needed for adoption of IEC standards (this might change in the future).</p>
