## To be discussed...

- ► Tables: Background & Use
- ►Importance of good-quality tables
- ► Drafting and Styling Basics
- ▶Do's and Don'ts of Drafting
- ▶Other uses
- ►Internal Regulations Part 3: Tables rules
- ► Recap & Questions

# Tables: Background and Use

# Tables: Background & Use

- ► Show content in a simplified/more concise way (Cl. 29, IR-3)
  - numerical data
  - data from testing

|             |                       | Din                | nensions in millimetres |
|-------------|-----------------------|--------------------|-------------------------|
| Type        | Length                | Inside diameter    | Outside diameter        |
|             | l <sub>1</sub> a      | d <sub>1</sub>     |                         |

| NOTE 1 Ta   | able note.            |                    |                         |
| NOTE 2 Ta   | able note.            |                    |                         |
| a Table fo  | otnote.               |                    |                         |
| b Table fo  | otnote.               |                    |                         |
| c Table fo  | otnote.               |                    |                         |

- ► Simple to use, but can cause problems
  - ► Make the document larger → more prone to XML errors
  - ▶ Complex tables → more prone to parsing errors

# Importance of Good-Quality Tables

# What can go wrong?

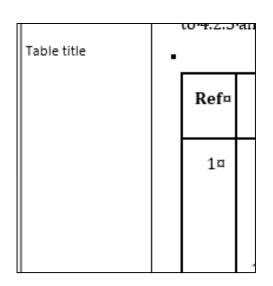

- Corrupted tables in Word
- Editing delays
- Possible errors introduced while correcting layout
- > Problems for members creating pdf from xml

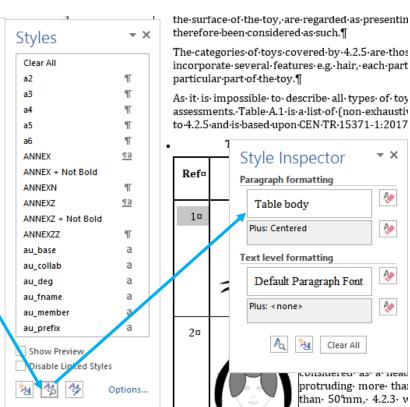

- ► Main styles:
  - ► Table header → used for the header row of a table (first 1-2 rows)
  - ► Table body → used for the main body of the table

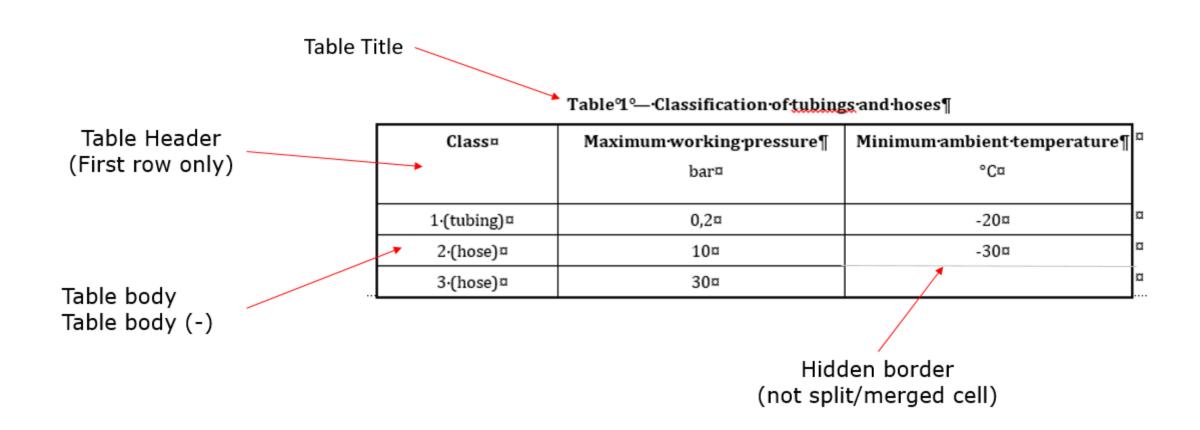

NOTE Styles for tables don't appear in the draft view style pane. Use the styling palette to access styles and ensure correct and successful application.

Style inspector shows styles not visible in style pane

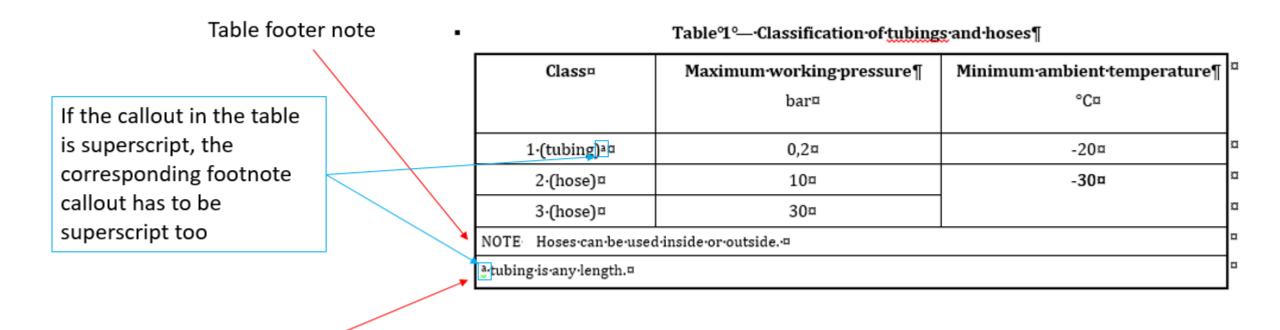

- ► Less common styles
  - ► Table footer/note

Table footer

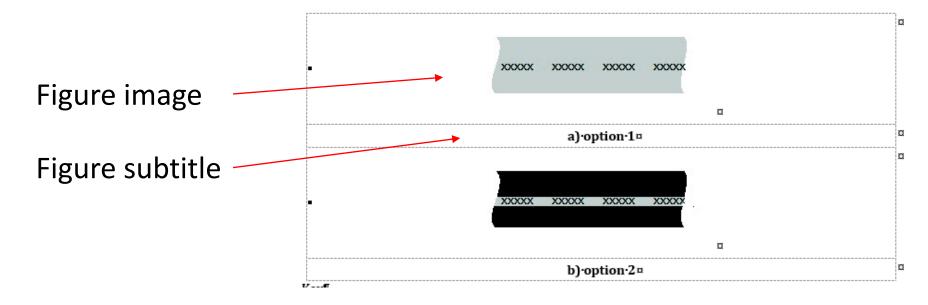

▶ Dimension 100

| <del>++</del> |      | ···    |                 |                         |
|---------------|------|--------|-----------------|-------------------------|
|               |      |        | Di              | mensions in millimetres |
| <b>-</b>      | Туре | Length | Inside diameter | Outside diameter        |
|               |      |        |                 |                         |

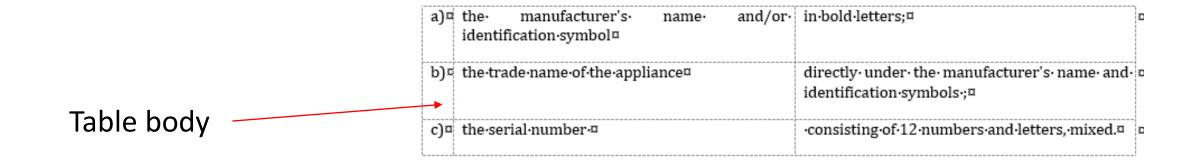

- ► Figures in table arrays
  - ► Figure image + figure subtitle

- ► Table arrays for list content
  - ► Table body for all rows

# Do's and Don'ts of drafting Tables

▶In table titles use EmDash "—" to separate the designation number and title

Table 10.3 — Welded built-up sections and longitudinal welds and not

Table 10.3: Welded built-up sections and longitudinal welds

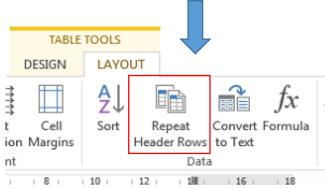

- ► Table titles always precede the table
  - > No text in between title and table EXCEPT dimensions

Table 3 — Dimension of type 2 test specimens

Dimensions in millimetres

| $Q_{\mathbf{n}}$ or $a_{\mathbf{n}}$ | b                      | min. b <sub>1</sub> | L <sub>o</sub> | L     | г  |
|--------------------------------------|------------------------|---------------------|----------------|-------|----|
| 20 ≤ <u>D</u> <sub>n</sub> < 50      | $a_n + \frac{D_n}{10}$ | b + 10              | 80             | ≥ 120 | 60 |

- ▶ No splitting or sub-dividing tables!
  - > Table spanning more than one page?

|                  | TABLE TOOLS |      |      | 1  | •       |         |        |

|   |                        | — small tiles or deflection not fully transmitted: $w_2+w_3 \le L/350$                                      |             |
|   |                        | — resilient flooring: $w_2+w_3 \le L/250$   |             |

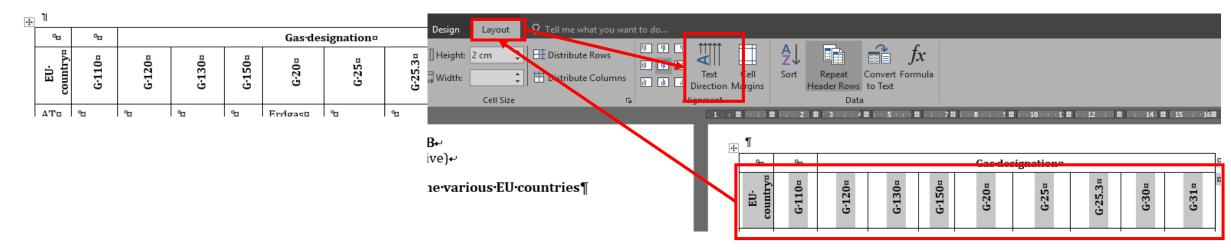

- Superscript/Subscript vs Raised/Lowered
  - ▶ Either to be used not both
  - ▶ If both → errors in XML
  - ► Time consuming to fix
- ▶ Only use a, b, c not \*

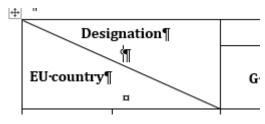

- Vertical text is permitted where necessary
  - ► Can save space to avoid landscape tables
  - ▶ Can increase readability keep to headers only!

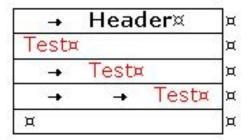

Don't split cells diagonally

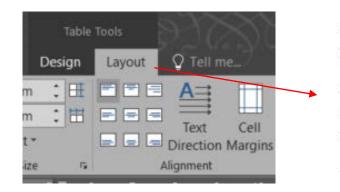

- ► Frequent use of tabs and indentation in cells
  - ▶ Is an issue particularly when creating XML (styling), and PDF

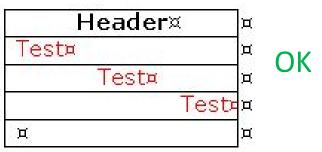

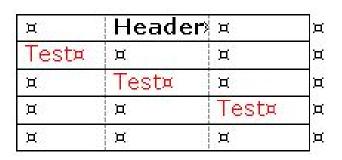

►To resolve this, indents can be replaced by additional columns or justifications

Use Word justifications

Create columns & hide borders

▶Instead, create a figure file of the image that can be inserted and linked in the document

► Also not supported by XML - black/dark background with white text

Heading

- ▶ Cite all tables in the text!
- ▶ No tables as images
  - Tables should always be drafted in Word, to be edited/translated and correctly styled
- ► Figures are not allowed to contain text
  - EXCEPT for Flowcharts which should be designated as figures (and not tables) and a separate figure file provided

- 'array' tables for layout
  - ► Formulae explanations NOT formulae themselves!
  - ▶ Neater lists/information where tabs don't align text properly

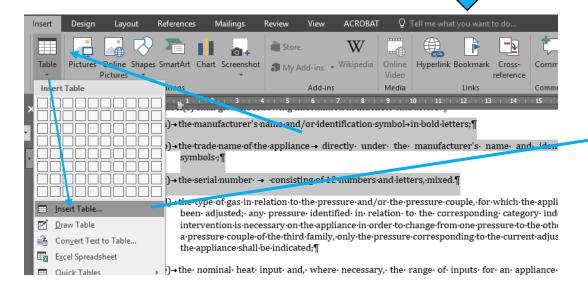

| Vα               | is·the·leakage·of·dry·undiluted·products·of·combustion,·in·cubic·metres·per·hour·(m <sup>3</sup> /h)·per·kilowatt·(kW)·of·heat·input;¤ | Ĭ. |

- ► Layout of multiple subfigures
  - where a vertical/linear layout would cross several pages
  - improves readability and saves page space

## ► How to create a table array with hidden borders:

- a)→the·manufacturer's·name·and/or·identification·symbol→in·bold·letters;¶
- b)→the·trade·name·of·the·appliance→ directly· under· the· manufacturer's· name· and· identificationsymbols-;¶
- c)→the·serial·number· → ·consisting·of·12·numbers·and·letters,·mixed.¶

| ++ | . , |                   |                                   |          |         | п  |   |  |
|----|-----|-------------------|-----------------------------------|----------|---------|--|---|--|
|    | a)¤ | the-<br>identific | manufacturer's∙<br>cation∙symbol¤ | name∙    | and/or· | in·bold·letters;¤  | 1 |  |
|    | b)¤ | the trad          | le∙name∙of∙the∙apj                | oliance¤ |         | directly·under·the·manufacturer's·name·and identification·symbols·;¤ |   |  |
|    | c)¤ | the∙seri          | al∙number∙¤                       |          |         | ·consisting·of·12·numbers·and·letters,·mixed.¤                       | 1 |  |
| 13 | . 1 |                   |                                   | 1        | ه. به   | 1 " 1 1 1 1 1 1  | 1 |  |

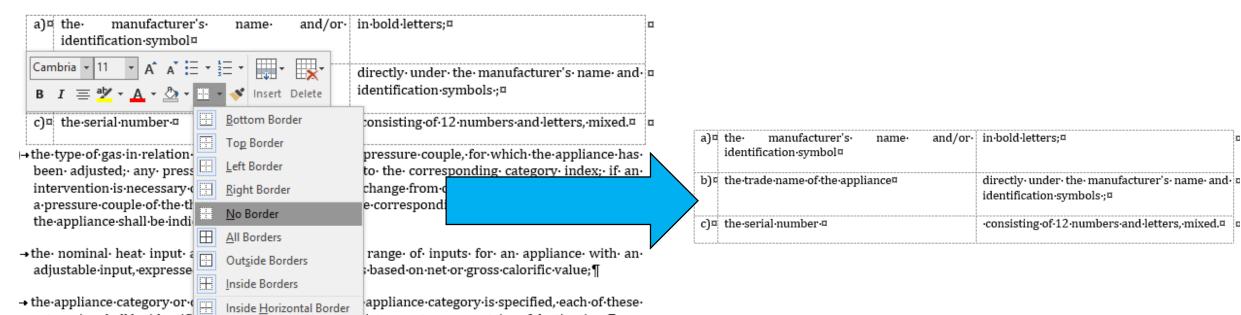

Inside Vertical Border

 $\triangleright$  one tab = two cells  $\rightarrow$  3 tabs = 4 cells

► Highlight table → 'no border' → borders invisible!

iate-country-or-countries-of-destination;

categories·shall·be·identifi

► Table arrays should be used sparingly

► They contribute to a heavy document → XML parsing problems

# Internal Regulations Part 3: Tables Rules

## IR3 rules for Tables

- ▶The simpler, the better!
- ▶ Tables are numbered sequentially up until the Annexes
  - > Annex numbering restarts, preceded by the annex letter (Table A.1)
- ►Subdivision of tables (e.g. Table 1a) or tables within tables not allowed
- ▶ Tables shall be explicitly referred to in the text
- ▶Notes and footnotes shall be located within the table
  - Notes preceding footnotes!
- ▶Footnotes shall use lower case letters a b c No \*
- ▶Footnotes may contain requirements, but NOTES may not
  - ► IR3, Table 8 how to use notes & footnotes

#### Remember...

- CCMC editors are available for editorial help prior to submission
  - ► Online or in person
  - ► Teams, Zoom or email possible

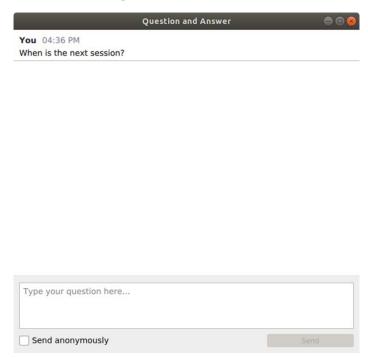

- ▶ If in doubt, get in touch!
  - ▶ production@cencenelec.eu
- ► Consult all Webinars for Standards Drafters

►Keep it simple!

## Question time

► Use the Q&A panel to submit your questions

**European Standardization Organizations**
